

VRT / DRT 410–440 VRT / DRT 3060–3140

oilless rotary vane compressores / vacuum pumps

Oilless rotary vane compressores / vacuum pumps

BACCA.

BACCA is a serie of oil-free rotary vane vacuum pumps and compressors. Facilities for vacuum application are labeled as VRT and for pressure applications DRT. Vacuum pumps and compressors BACCA are intended for continous operation and are commonly used in various industrial applications. The device is supplied in single-phase or three-phase design. Models DRT 425K and DRT 440K have installed cooler of outlet pressed air.

MAIN BENEFITS:

- high reliability,
- long life of bearings and vanes,
- precise execution,
- fine-filter of intake air is included,
- compatibility of some parts with other manufactures,
- fast customer service.

Type	Max. flow (m ³ /h)		Max. vacuum abs. (mbar)	Max. pressure rel. (mbar)	Motor power (kW)		Noise dB (A)		Weight (kg)
	50 Hz	60 Hz			50 Hz	60 Hz	50 Hz	60 Hz	
DRT/VRT 410	10	12	150	1000	0,37	0,45	58	60	21
DRT/VRT 416	16	19	150	1000	0,55	0,70	59	61	24
DRT/VRT 425	25	30	150	1000	0,90	1,10	60	62	32
DRT/VRT 440	40	48	150	1000	1,25	1,85	65	68	38
DRT/VRT 3060	55	66	100	1500	1,30	1,70	71	73	70
DRT/VRT 3080	67	78,5	100	1500	1,70	2,20	72	75	70
DRT/VRT 3100	98	112	100	1500	2,60	3,30	75	77	103
DRT/VRT 3140	129	154	100	1500	3,30	4,40	76	79	113
